Kirtan Kumar Patel

kirtankumarpatel0624@gmail.com| (+91) 7828998697

@kirtan /kirtan

SKILLS

- **Programming Languages:** Java, Python, C++
- **Data Structures and Algorithm**
- **AI/ML**

EDUCATION

- Computer Science | VIT Bhopal University *CGPA*: *8.2* | *(Sep'23-May'2027)*
- XII (CBSE) |St.Gabriel's Hr. Sec. School *84%| 2022*
- X (CBSE) | St. Gabriel's Hr. Sec. School *94%| 2020*

CERTIFICATION

- **AIML (Specialization in Drone Technology) | TiHAN, IIT Hyderabad** *(June'25-Dec'25)*

  Learning applications of Artificial Intelligence and Machine Learning in autonomous systems and drone technology .

ACADEMIC PROJECTS

Helmet Detection (YOLO, Python)

- Developed a real-time computer vision system using the YOLO algorithm to automate and monitor workplace safety compliance.

Anime Face Generation (GAN, Python)

- Designed and trained a DCGAN on 50,000+ images to generate stylistically coherent character portraits from random noise.

Computer Vision Pushup Counter (OpenCV, Python)

- Built a real-time fitness tracking application using OpenCV and pose-estimation (MediaPipe) to map body landmarks, calculate joint angles, and count repetitions.

Credit Card Fraud Detection (Scikit-Learn, Python)

- Engineered an ML pipeline using Random Forest and XGBoost to identify fraudulent transactions.

- Applied SMOTE to resolve severe dataset class imbalance, achieving high precision and recall.

Customer Sentiment Analysis (LSTM, Python)

- Developed an NLP deep learning model using LSTM networks, word embeddings, and tokenization to classify e-commerce reviews as positive, negative, or neutral.
